PROFILE SUMMARY

Detail-oriented Software Engineer with a strong foundation in Artificial Intelligence and Data Science, experienced in hands-on Design, Programming, and Scripting to deliver scalable, end-to-end web frameworks and web development. Proficient in Python, SQL, JavaScript, and ReactJS with practical exposure to backend frameworks (Django/Flask) and database management. Skilled in implementing UI/UX best practices, optimization, performance tuning, and troubleshooting complex issues in real time within collaborative, fast-paced environments. Knowledgeable in modern software development practices including API integration, automation concepts, and cloud-based workflows. Experienced in applying Data Structures & Algorithms to build efficient solutions and contributing to cross-functional projects with product and engineering teams. Committed to continuous learning, innovation, and delivering high-quality results through strong problem-solving and technical execution.

EDUCATION

Usha Rama college of Engineering and technology
B-Tech | Artificial Intelligence and Data Science

2025

CGPA: 7.60/10

TECHNICAL SKILLS

Python, SQL, object oriented programming, React js, Angular, HTML5, CSS, BOOTSTRAP, JavaScript, Flutter.

INTERNSHIPS

Android Developer Virtual Internship At Aicte eduskills

Jan 2024 - Mar 2024

- Continuously enhancing skills in Android app development, implementing user-friendly interfaces, integrating APIs, testing and debugging applications, and optimizing app performance.

Java Full Stack Internship At Makeskilled

July 2024 - Oct 2024

- Actively refining skills in Java Full Stack development, including building dynamic web applications using HTML, CSS, and JavaScript, and developing robust backend systems with Java and Spring Boot.

PROJECTS

Chat Application (Flutter). [\[Github\]](#)

I Designed and developed a feature-rich Chat Application using Flutter and Firebase to enable seamless real-time communication, Implemented authentication, instant messaging, cloud storage, and push notifications with a responsive and scalable UI.

Skillconnect a Social And Business Networking Platform For Service Discovery And Booking (Java Springboot). [\[Github\]](#)

Developed SkillConnect, a social and business networking platform using Java Spring Boot, enabling seamless service discovery and booking. The platform connects users with professionals, streamlining service requests and fostering collaboration. Implemented RESTful APIs, user authentication, and database integration to ensure secure and efficient data management. Optimized backend performance and designed scalable architecture to handle real-time requests, improving reliability and overall user experience.

Smart Bike Rental Platform. [\[Github\]](#)

HTML, Python, Flask, SQLite, ML, NLP The platform allows users to buy, sell, or rent bikes through an intuitive interface, with operations managed by Flask APIs and SQLite, and enhanced by ML-driven predictions and an NLP-based chatbot. Implemented secure user authentication, booking workflows, and real-time availability tracking to ensure smooth transactions. Improved system performance by optimizing database queries and integrating intelligent recommendations to enhance user experience and engagement.

CERTIFICATIONS AND ACHIEVEMENTS

- Artificial Intelligence-Human Interactions and Methodologies – Infosys Springboard
- Core Employability Skills – Edunet Foundation, APSSDC
- Introduction to Industry 4.0 and Industrial Internet of Things -NPTEL
- Blockchain and its applications -NPTEL
- Privacy and Security in Online Social Media -NPTEL

SOFT SKILLS

Problem-solving, Time management, optimism, Interpersonal communication, Active listening, Creativity, flexibility, Patience, Adaptability, and Leadership.
